

Candice Prince, PhD

Agronomy Department
Center for Aquatic and Invasive Plants
University of Florida, IFAS
Email: CPrince14@ufl.edu

Dr. Candice Prince is an Assistant Professor in the Agronomy Department at the University of Florida. She is located at the Center for Aquatic and Invasive Plants. Candice received her BS in Restoration Ecology from UF in 2014, then continued on with UF to work on her doctorate in Environmental Horticulture. She graduated with her PhD in 2019. Candice has worked on the biology and control of a variety of invasive grass species, including cogongrass, torpedograss, and phragmites. In her current position, she is the Program Coordinator for the graduate Weed Science Certificate and conducts research on aquatic plant management.
