Taking up the corner of the Pacific Northwest, Washington State offers endless discoveries for people who love natural beauty. From Canada to Oregon and east to Idaho, the state is divided by the north-south Cascade Mountain Range and the Olympic National Mountains. Noted features are Mt. St. Helens that erupted in 1980, Mt. Rainier at 14,411 feet and Mt. Baker at 10,781 feet. Lush western Washington is green year-round with its temperate rainforest climate. Arid eastern Washington plays host to orchard country, desert landscapes with plunging canyons left over from the Great Ice Age Flood, ponderosa pine forests and rolling hills of wheat and agriculture. An abundance of natural beauty, recreation opportunities and experiences make you look forward to every turn in the road. We invite you to come explore Washington State.
