

BE A PART OF THE USACE TEAM WITH A CAREER IN Natural Resources Management

The U.S. Army Corps of Engineers team of more than 34,000 dedicated civilians and soldiers deliver timely and quality engineering, technical and management services to customers in more than 90 countries. Through our headquarters office, division offices, district offices, centers, labs and active components, our team is working to provide better, safer, and more environmentally sound services around the world everyday. USACE has taken this approach to heart realizing that those we serve and protect are also our mother and fathers, sisters and brothers, sons and daughters. Here's how to join our team and help us meet our missions of today and tomorrow.

How to Apply:

If you are a student, USACE offers temporary positions at most project offices. Student programs are available to those seeking a degree at a high school (students 16 years of age or older), technical or vocational schools, two-year or four-year college or university, and graduate or professional schools. For information on this program, please visit <http://acpol.army.mil/employment>.

For all others, USACE job openings can be found on the USAJOBS website at www.USAJOBS.com. If you are currently employed by the federal government, you can search for USACE job openings by visiting <http://acpol.army.mil/employment>. In both cases, you can find openings, where the job openings are located, learn whether or not you qualify, build your resume and apply online for the job you want. It's fast, it's easy and your next career opportunity is just a few clicks away.

EXCITING CAREERS IN...

Natural Resources Management

As the nation's largest federal provider of outdoor and water-based recreation, the U.S. Army Corps of Engineers (USACE) provides you with the opportunity to join a diverse team of skilled professionals who work every day to preserve, manage and improve nearly 12 million acres of our nation's public lands and waters.

If it's the outdoors you enjoy, or sharing with others what nature has to offer, then our team of Park Rangers, Natural Resources Specialists and other exciting job specialties awaits you. As managers of more than 400 lake and river projects in 43 states, USACE projects provide individuals the opportunity to work in nearly every type of environment, interact with a variety of wildlife and plant species, provide recreation and water safety education, and gain experience in shoreline and land management. Our team members are encouraged to continue their career development, and USACE offers many opportunities to further your education and strengthen your career.

If you would like to know more about the exciting and rewarding opportunities with USACE, check out our latest Natural Resources Management recruitment video at:
