

To all,

I have just been advised by the Depot that the annual passes were delivered in boxes of 30 books each. Accordingly, the distribution shown in the attached report may be adjusted, in some cases, to avoid splitting boxes. This will facilitate both the shipping and the tracking of these accountable forms.

Therefore, you may receive a few more or less books than are shown on the attached for your initial distribution. Please adjust your special orders accordingly, if necessary, to assure your requirements are met.

Thank you,  
Judy Rice

**Subject:** 2004 Annual Passes

To all,

The 2004 annual passes arrived at the OCE Publications Depot last week. This morning, I ran an OMBIL report and requested distribution accordingly. The Depot has made the annual passes top priority and has begun distribution already.

Attached is the OMBIL report, showing what each project input as their requirements. As always, the passes are being distributed to the districts for further distribution to the projects.

When you look at the report, you will see that many projects which should have requirements, show none - zeros. It also looks like some projects may have entered their requirements in books, rather than passes. The OMBIL field definition is for passes, because we may not always order them in books of 30. For 2004, however, there are 30 passes per book, so if required books - rather than passes - were entered, the project will get about 1/3 of their requirements.

If your project/district/division has annual pass requirements not shown on the attached report, you may place a special order with the Publications Depot, using your regular ordering procedures. These special orders will be filled after the initial distribution is made.

It would be preferable, of course, if a district consolidated special order were made - rather than separate orders for each project. This would reduce the time, effort and cost of filling these orders.

This is clearly not our preferred or ideal situation. Without the necessary data in OMBIL, however, this is the most fair way to proceed. Those projects which entered their requirements will receive their passes first. Special orders from projects which didn't enter their data will be filled next. There should be adequate passes at the Depot to accommodate all project requirements. The only alternative to using the OMBIL data is issuing a data call as we have in years past, which we have all agreed we want to avoid.

To improve this process next year, please consider entering your 2005 requirements into OMBIL now. If you have problems or need assistance, you may visit <http://corpslakes.usace.army.mil/employees/ombil-rec/ombil.html> for information. You will find the district and division POCs listed at this site, as well as a list of OMBIL/Recreation User's Group members. Any of these individuals should be able to help with the data entry.

Thank you,  
Judy Rice
