Army Corps of Engineers waives fees on National Public Lands Day, Sept. 30

WASHINGTON, D.C. – The U.S. Army Corps of Engineers (USACE) announced today that it will waive day use fees normally charged at boat launch ramps and swimming beaches at its recreation areas nationwide in recognition of National Public Lands Day on Saturday, Sept. 30.

The waiver does not apply to camping and camping-related services, or fees for specialized facilities such as group picnic shelters. Other agencies and partners that manage recreation areas located on USACE lands are encouraged, but not required, to comply with this waiver of day use fees in the areas they manage.

In addition, volunteers who participate in one of USACE's National Public Lands Day activities will be issued a fee-free coupon if the volunteer site is participating in the coupon program. Volunteers should check with their local USACE project for more information. The fee-free coupon is valid for one year from date of issue and may be used for one day of entrance or day use fees at any participating federal agency's park, forest or recreation area that charges either of these types of fees.

Thousands of volunteers are expected to support the more than 76 USACE projects participating in this year's National Public Lands Day, the largest annual volunteer hands-on restoration activity of its kind. Volunteers at USACE sites will take part in tree planting, erosion control, bank stabilization, building trails, restoring recreation areas, trash pickup, removing invasive species and non-native plants, improving wildlife habitats, harvesting prairie plant seeds and rehabilitating playgrounds.

Last year, more than 6,000 volunteers participated in National Public Lands Day activities at 72 USACE lakes. The volunteers cleaned 285 miles of shoreline, maintained 105 miles of trails, removed 59,000 pounds of trash, and planted approximately 400 trees and shrubs on USACE-managed lands.

USACE has been involved with National Public Lands Day since its inception in 1994 and has consistently been one of the event's largest providers of sites and volunteers. USACE manages more than 400 lake and river projects in 43 states. With 90 percent of these projects located within 50 miles of metropolitan areas, USACE sites provide a wide range of safe and affordable outdoor recreation opportunities close to home.

For more information on National Public Lands Day or to find events near you, visit <http://www.publiclandsday.org/> or call your local USACE lake or river office. For more information on USACE recreation opportunities visit www.CorpsLakes.us.
