Cooperation along the Columbia

s from the United States
ther to manage
rves a variety of
city to the presen
ions must coop
both countries.

You can take a boat from the Pacific Ocean 400 miles to Lewiston, Idaho. On your way you'll pass through eight major dams.

These Idaho potatoes and Washington apples, along with grapes, corn, wheat, peas, and a vast assortment of other crops depend on irrigation. Almost 90% of the Columbia Basin's water is diverted for agriculture.

The Balancing Act

You Can't Just Go with the Flow

...who live upstream often have different views than those who live downstream. And for one it's just the opposite of what...

...managing Libby Dam, how would the upstream economy that depends on the needs of downstream...

...the lower Columbia? First, you have to look at all sides.

Please continue seeking, creating, capturing, and curating powerful storytelling moments occurring every day at USACE Projects!

Promoting engagements with volunteers and partner organizations fuels hope and enthusiasm, adds immense capability to delivering USACE Civil Works programs, and excites community stakeholders.

Thank you to all participants!
