Partnerships in OMBIL

The Operations and Maintenance Business Information Link (OMBIL) was developed to provide a single location for data required to operate and manage the Operations function of the Corps. OMBIL contains modules for each business function, which currently include Navigation, Hydropower, Recreation, Environmental Stewardship, Environmental Compliance, Flood Risk Management, Water Supply, and Safety & Occupational Health. All business functions can be accessed through the [OMBIL Web page](#).

The Partnerships pages in OMBIL are currently located under the Recreation Business Function. Data Input Forms can be found in the Business Function Data Input screen, listed in the drop-down menu under "REC- Partnership Agreements" and Reports are listed in the drop-down menu under "REC- Partnership Detail Report." Access to the Data Input Forms requires special permissions through the OMBIL administrator. Reports can also be accessed through the Business Function Reports screen under "REC- Partnership Detail Report" by anyone with access to a Corps computer (no password or special permissions required).

Annual fiscal data entry for the Partnership pages opens each year October 1 - December 31 (on the REC- Annual Update data input form) to enter the value of each partnership for the prior fiscal year. However, new partnership agreements can be entered or edited at any time during the year.

Note: Partnership data entry involves a two-step process. Step 1 (Available anytime during the year): Enter information about the partnership, including agreement type, organization, organization type, date effective, description. Step 2 (Available only during annual update period Sep/Oct): Enter information about the value of the partnership, including number of volunteers, volunteer hours, partner funds invested, professional services provided, materials and equipment donated, Corps contract funds, services, materials and equipment, and additional investments.

Why Good Data Matters

US Army Corps
of Engineers®

Good Data Tells the Corps Story

Era of increasing focus on partnerships → HOW we do more with less

Interest not just in what we do, but who we work with

- Scout troops
- Tourism bureaus
- Youth service and conservation corps
- Outdoor recreation industry
- STEM-focused education groups

FY 16 Partnerships and Volunteer Program Summary Sheet

*Data from OMBIL Rec-ES Modules

Our partners and volunteers are organizations and people who want to give back to their communities and are interested in being involved in the Corps natural resource management program. They are families who want to share a day of service together, nonprofit groups looking for public lands to carry out their missions, local businesses that rely on the public resources provided by Corps lands and waters, outdoor enthusiasts wishing to create and maintain their favorite recreation opportunities, and concerned citizens interested in making meaningful contributions. Whether it is an environmental ethic, a love of parks, or enthusiasm for the outdoors, like-minded partners and volunteers share their passions and work together for a common cause.

Total partnerships:
1,393 (plus an additional 279 co-partners)

Corps projects with partnerships: 293 of 404 (73%)

Total value of partnerships:
\$59,846,413
(Corps: \$10.1 million investment/ Partner leveraged investment: \$49.7 million)

We strive to match our partners and volunteers' talents and interests with work to be done, in order to achieve our common vision and goals. While partners and volunteers are not a substitute for Corps management of the federal resources, they help accomplish programs and activities for which funding is not available and therefore would not normally be performed. In FY 2016, 42% of our partnerships were for environmental stewardship projects, and 58% were for recreation projects.

- **Boy/Girl Scouts:** 2,600 scouts from 38 troops were able to complete eagle scout projects, learn new outdoor skills, beautify parks through shoreline cleanups, raise funds by recycling, perform service projects, earn badges, and participate in educational programs by park rangers to learn about natural resource careers
- **Cooperating associations:** 47 nonprofit associations held special events, operated bookstores, provided interpretive programs, and served as community advocates for the Corps
- **CVBs and businesses:** More than 200 businesses, visitor's bureaus, and chambers of commerce partnered with the Corps to offer recreation related services and supplies to visitors while also generating an economic benefit to the local communities.

- **Educational institutes:** Corps lakes provided 32 universities and schools with hands-on learning in an outdoor classroom setting, research projects, volunteer projects to meet service goals, water safety and environmental education programs, and career days.
- **Youth service and conservation corps:** 40 Corps lakes worked with conservation service corps organizations to provide 16 to 25 year old youths with job training, academic programming, leadership skills, and experience in environmental stewardship and recreation projects.

- **Outdoor recreation organizations:** 123 clubs, national organizations, and other recreation groups partnered with the Corps to improve access, upgrade facilities, and create new opportunities for their members and the public at Corps lakes.
- **Conservation organizations:** 277 public and private entities, including federal and state land management agencies and non-profits wildlife and conservation groups, completed projects to improve habitat and meet their stewardship goals.

Total volunteers: 45,104

Volunteer hours: 1,562,328

Value of volunteer service:
\$36,808,488

(Total volunteer hours x \$23.56/hour standard rate set by the Independent Sector and the Bureau of Labor Statistics.)

Corps projects with volunteers: 315 of 404 (78%)

Hours served by each volunteer: Ranged from 1 hour to 1,173 hours

Beginning in 2016, Corps volunteers who served 250 hours with the Corps of Engineers or other participating Federal land management agencies became eligible to receive an America the Beautiful (ATB) Interagency Volunteer Pass. In addition to the ATB pass, Corps volunteers who serve 100 hours are eligible for a Corps annual day use pass. In FY 2016, **42 Corps annual passes and 26 America the Beautiful Volunteer passes were issued to Corps volunteers for their service.**

Volunteers who perform exceptional service are also eligible to receive a Corps Foundation Volunteer Excellence coin, and can be nominated for the Corps Foundation sponsored National Volunteer of the Year Award or the Enduring Service Award.

** (Note: 31K of total volunteers, 319K of total volunteer hours, and \$7.5M of total volunteer service value were from volunteers with a partner organization)

Maximizing Your Data Entry

US Army Corps
of Engineers®

Partnership Data Tracking Spreadsheet

- This can assist with keeping track during the year to make data entry in October much easier
- Available on OMBIL Partnerships FAQ page: <http://corpslakes.usace.army.mil/partners/ombil-annual.cfm>

[illegible]

Entering National Public Lands Day (NPLD) Events

- 1) Enter volunteer data into the Volunteers module of OMBIL
- 2) Enter the event into the Partnerships module of OMBIL
 - a) If other partners are involved, list National Environmental Education Foundation (NEEF) as the primary partner and all others as co-partners
 - b) If no other partners are participating in the event, just list NEEF as the primary partner
 - c) Partner contribution should be the volunteer hours performed within the scope of the event.

Don't forget national partners for other events

- * Get Outdoors Day – American Recreation Coalition (ARC)
- * Kids to Parks Day – National Park Trust
- * FLW Fishing Events – Fishing League Worldwide (provide booth space)

Entering Volunteer Hours Correctly

What OMBIL **DOESN'T** auto calculate:

- Total number of volunteer hours worked
 - Enter the TOTAL HOURS, not hours per volunteer
 - If you have 5 volunteers that worked 3 hours each, total volunteer hours should be 15 (not 3)

What OMBIL **DOES** auto calculate:

- Value of volunteer service
 - Automatically multiplies the total number of hours times the annual “value of volunteer service” set forth by the independent sector.

US Army Corps
of Engineers®

Volunteer Data Decision Tree

Available on OMBIL Partnerships FAQ page:

<http://corpslakes.usace.army.mil/employees/faqs.cfm?Id=partner-OMBIL&Nav=partner&View=Yes>

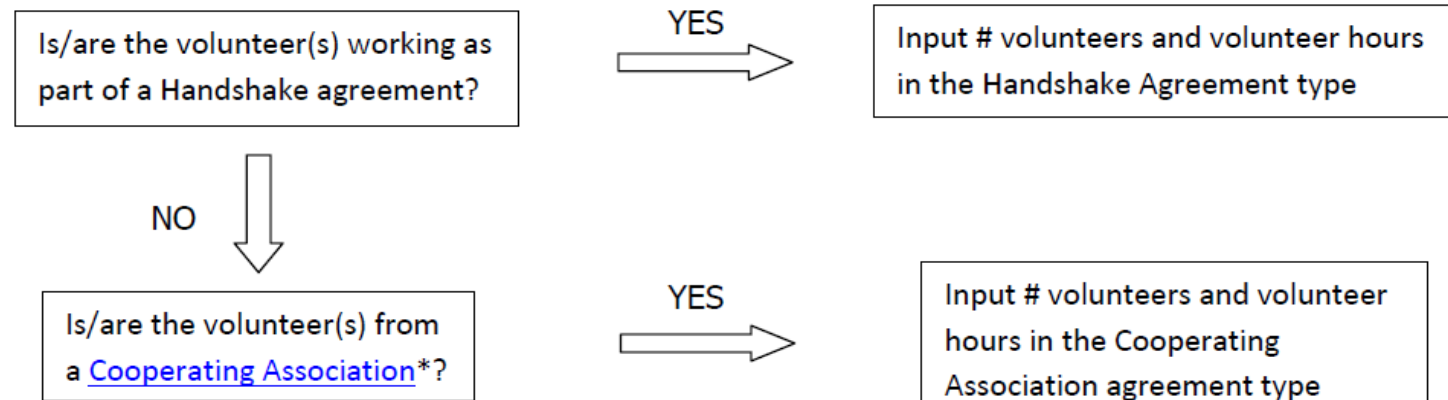

Step 1. Recreation Annual Update- Annual Project Data Update

Enter ALL volunteer hours in this section of OMBIL. This is where you will capture the total number of volunteers, total hours of volunteer service (which will auto-calculate the total value of the service), and total incidental expenses reimbursed to all volunteers for the FY.

Step 2. Recreation Annual Update- Partnership Update

In addition to gathering information about the overall number of volunteers, hours, and value, we are also trying to capture more detailed data about volunteers that are part of a partnership. Some volunteers such as camp hosts, gate attendants, and other individuals that volunteer may only be counted in the Annual Project Data Update. Other volunteers that are part of a group which falls under a partnership agreement, should also have their hours counted in the Partnership Update.

Please use the flow chart below to determine whether to count a particular individual volunteer's or group of volunteers' hours in the Partnership Update section of OMBIL.

US Army Corps
of Engineers®

Tracking Materials Costs

Make sure that materials costs are included in your partnership data.

- If a Boy Scout Troop comes to work on your project and they bring their own gloves, include the cost of gloves in their contribution.
- If a project vehicle is used to move materials to volunteer sites around the project, include an estimate for vehicle cost to your materials provided to the partnership.

US Army Corps
of Engineers®

Student Conservation Association

Enter Student Conservation Association (SCA) interns and other similar Conservation Corps interns as a Cooperative Agreement.

Number of interns/hours served would be captured in the volunteer columns. The partner share by SCA goes in the “partner funds invested” column.

The Corps share (what the Corps pays the SCA) goes in the “contract funds” column.

Civil Works Operations and Maintenance Program Areas

From the program-area links on this page, users may access O&M summary information, site maps and image files, as well as individual data input and reporting modules. Within these business management information areas, users will also find ready-reference materials as well as links to web sites presenting associated topical information.

OMBIL EDW for All Business

The OMBIL All Business Line has published its initial module in the Enterprise Data Warehouse (EDW). This analytical reporting module is designed to replicate the data and information originally available to users in the OMBIL Business Summaries or "cubes." However, the EDW user interface provides an expanded and enhanced user experience, with the ability to save and re-run reports and readily share data output with others. In addition, as a registered user of the USACE EDW, you can access the entire suite of available standard USACE data and information in a single repository. For registration details please visit the EDW website at <https://edw.usace.army.mil>.

Step 1:

Please select a category below to change the options at the right.

In Reading mode, the user may change the prompts, the filters, or the input controls. The user may also toggle between the various report tabs available. The user may export the report as an excel spreadsheet, or email the report to other EDW Users. Note: in order to make design changes, the user must first save the report to his or her favorites folder.
