

Along The River, Mississippi River Project's Guide to Recreation

The 'ATR-Along The River' magazine is published annually to provide visitors with up-to-date information on the numerous recreational and educational opportunities available from the Mississippi River Project Office, U.S. Army Corps of Engineers.

Partnerships between the USACE MRPO, The Dispatch Argus and The Quad Cities Convention Bureau have allowed the funding for the ATR to be published successfully for the past 15 years.

The ATR is widely distributed throughout the MRPO, covering both sides of the 314 river miles within the Project. This distribution includes, but is not limited to, Visitor Centers/Bureaus, businesses, recreational/campground/ park facilities, and upon request by individuals who are planning to visit our areas within the MRPO.
