Authorization Description:

This is a pre-order for provisioning of an AT&T Connect conferencing (web and phone) account for the scheduling of AT&T Connect webinars and teleconferences. AT&T Connect conferences (web and phone) may be scheduled as standard events with up to 300 connections or large/broadcast events with up to 1500 connections(maximum). Additional services are available for operator and speaker sub-conference management, recording format conversion and event management for conducting registration-based, import/invite-based and/or teleconference attendance reporting (by name and duration).

An AT&T Connect Event Services specialist will assist the with the proper selection and configuration of services. Teleconferences may be reserved/scheduled via email, web, or via direct request to AT&T Connect Event Services organization.

Products and services included below are for reference only. Products and services delivered are determined by each individual event scheduling request. Agency may request estimated costs prior to scheduling of an event.

Pricing Notes:

This is a pre-order only. Agency will be billed after the completion of a conference for per minute web, phone, and event services used. This pre-order includes the US per minute dial-in access rate. All AT&T Connect conferences include international dial-in access. A complete list of international dial in rates will be provided upon request.

Billing Notes:

Agency is billed actual use after the completion of a conference. There are no unused port or connection charges. All operator services billed at hourly rates with a minimum charge of 30-minutes.

*Event Services Estimate
See Page 2 for detail*

DAR Authorization/approval required prior to commencement of event services.

Estimate: **$0.00**
