

Operations & Regulatory Community of Practice

M. Kathleen Perales
Project Leader

Bonnie Bryson, Ed.D
Technical Coordinator

July 2010

How do CoPs make you feel?

CoPs

- Help
- Are Good
- Provide security
- Protect us from the bad...

CoPs are the People

Community of Practice in the Corps

“is a group of people who regularly interact to collectively learn, solve problems, build skills and competencies, and develop best practices around a shared concern, goal, mission, set of problems, or work practice.”

“Ideally, every USACE team member will be a member of at least one CoP”

ER – 25-1-8

Operations Project Manager Notes

Welcome to the Operations Project Manager Community

As an Operations Project Manager (OPM), you function in a key role to accomplish the Corps' Operations and Maintenance mission. You may manage a single project or a number of projects within a watershed or geographic area. You may even reside in a District office. You may be responsible for a number of different business lines or just one. Regardless of your title or situation you can benefit greatly from sharing success stories and challenges with your peers, as well as taking advantage of technical research and resource leveraging. This site provides a variety of resources to help you do just that and more.

Here's the Concept ...

Think
Shopping
Mall

Think of a shopping mall

- Anchor stores (ways in)
- Specialty shops (with one-of-a-kind items)
- Multiple stores sell shoes (sometimes you have to look at several shoe stores to find the pair you want)
- Some places are off limits to the public (secured information)

Natural Resources Management Notes

Welcome

The Army Corps of Engineers is the steward of the lands and waters at Corps water resources projects. Its **Natural Resources Management (NRM) Mission** is to manage and conserve those natural resources, consistent with ecosystem management principles, while providing quality public outdoor recreation experiences, to present and future generations.

Operations and Regulatory Corporate Board

The Operations and Regulatory Corporate Board is being formally established to guide the Operations Mission of the Civil Works Program under the One Headquarters concept. A Project Management Plan (PMP) is under development to describe the team, its roles and processes. The PMP will be posted on this page when complete, as will minutes of the Board's meetings and the products of its deliberations.

Cooperation Gets it Done

Lake: [Lake Shelbyville, IL](#)

Partners: [USACE](#); [Illinois Department of Natural Resources](#); [Southwestern Illinois Resource Conservation and Development, Inc.](#); Stakeholders of Kaskaskia Watershed

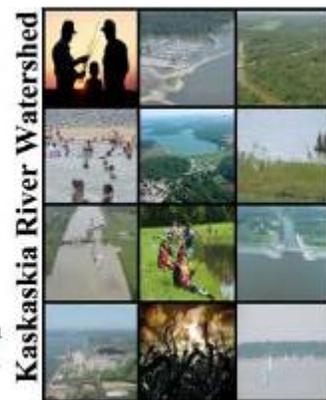

Partnership Type: Association/Partnership, KWA Stakeholders, Federal, State and Local Governments

Corps POC: Robert Wilkins, Project Manager Carlyle Lake/Kaskaskia Navigation Project; Andrea Lewis, Project Manager Lake Shelbyville

Story: Kaskaskia Watershed Association, Inc. (KWA) started meeting together in 1996 and incorporated and received their not-for-profit status in 2002. Their goal is to develop, enhance, and protect the economic and socio-ecological values of the natural resources within the Kaskaskia watershed. Four major areas form the KWA from the headwaters of the Kaskaskia River at Champaign to the confluence of the Mississippi River. The watershed itself is very diverse but the stakeholder's goals are the same: recreation, flood damage

The screenshot shows the 'Corps Lakes Gateway' website. At the top, it features the US Army Corps of Engineers logo and the tagline 'Your gateway to fun at Corps Lakes!'. Below this is a navigation bar with dropdown menus for 'Select a State', 'Select a Corps of Engineers Lake', and 'Select an Activity', followed by a search bar and a 'Go!' button. The main content area is divided into several sections: 'Trip Planning' with links to 'National Recreation Reservation Service (ReserveUSA)', 'Recreation.gov', and 'USACE Recreation Brochures'; 'DoD Opportunities' with links to 'Great Travel Deals' and 'Paths Across America'; 'Happenings Around the Lakes' with links to 'Lewis & Clark Signature Events', 'National Public Lands Day', 'Healthier US', 'National Recreation Lakes Study', and 'Great Outdoors Month'; and 'Become a Volunteer' with links to 'Corps Clearinghouse' and 'Volunteer.Gov'. A map of the United States is displayed on the right side of the page, with an inset map of Alaska and Hawaii. The date 'May 3, 2006' is visible in the top right corner of the page content.

The screenshot shows the 'RECREATION.GOV' website. The top navigation bar includes links for 'Home', 'Recreation Search', 'Camping', 'Day Use', 'Tours', 'Permits', 'Search by Map', and 'My Reservations & Account'. Below the navigation bar, there is a welcome message: 'Welcome - already a member? Sign In Not a member yet? Sign Up'. The main content area features a search form on the left with fields for 'Looking for' (set to 'All sites'), 'State', '(optional) State', 'Near' (City or ZIP), 'Park or Facility name', 'Camping dates (optional)' (with radio buttons for 'Specific' and 'Range'), 'Arrival date', and 'Length of stay'. A 'Search' button is located below the form. To the right of the search form is a large image of a horseshoe crab on a beach. Below the image, there is a text block about 'BOMBAY HOOK NATIONAL WILDLIFE REFUGE - DE - FW3 Since 1951'. To the right of the image is a 'Tours and Tickets' section with a link to 'Reserve Your Place Under the Stars' and a 'Share the Experience' logo. The bottom of the page features the 'AMERICA The Beautiful' logo and the text 'The National Parks and Federal'.

Safety Inspectors Aim To Prevent Holiday Boating Accidents

NRM Gateway Principles

1. Make it all about the Community of Practice.
2. Initially focus on the innovators.
3. Create events that make sharing a fun way to learn together.
4. Keep it simple... and real.
5. Be a marketplace for ideas.
6. Serve as a leadership tool.
7. Be a part of the daily routine.
8. Continuously reinvent and improve.

Project summary

The Twin Pond Restoration Project was accomplished by excavating dredged material to restore over 23 acres of salt pond and salt marsh habitat.

Ecosystem Restoration and Management

U.S. Army Corps of Engineers | Engineer Research and Development Center | Environmental Laboratory | Search EL

The U.S. Army Corps of Engineers is required to evaluate and mitigate the environmental impacts of Corps water resource development activities at the ecosystem level. Ecosystems that are of particular concern to the Corps are streams, riparian corridors, wetlands, and special aquatic sites. The Corps has developed the following programs in response to the demand for new and expanding technologies to address the need for ecosystem assessment, restoration, and stewardship of high priority ecosystems:

The Ecosystem Management and Restoration Research Program (EMRRP) develops, verifies, and demonstrates user-oriented techniques to predict and assess impacts to ecosystems. The EMRRP documents and quantifies the ecosystem effects associated with various Corps activities. Under the EMRRP, practical engineering and resource management strategies have been developed and demonstrated to minimize adverse effects and to protect and manage important natural and cultural resources.

The Wetlands Regulatory Assistance Program (WRAP) provides direct scientific and engineering technical support to the Corps' Operations and Maintenance (O&M) Regulatory business practice. WRAP provides rapid, direct, scientific, technical, and engineering assistance to USACE Headquarters and to Corps Division and District requests for site- and/or problem-specific issues.

The Wetlands Restoration Program (WRP) was developed to advance the state of the art of wetlands science, engineering, and technology. Major research areas included critical processes, delineation and evaluation of wetlands, restoration and establishment of wetlands, and stewardship and management of wetlands.

See the [project website](#) for additional information.

Project summary

The south shoreline of White Lake had been retreating at an estimated average of 15 feet per year as a result of wind-driven energy. Continued south shoreline erosion would have likely breached low marsh management levees and increased interior marsh loss rates in this area. A segmented rock breakwater (sometimes called a foreshore dike) was constructed in shallow water parallel to the shoreline. Due to soft, organic shoreline material, the rock was placed on geotextile fabric and is expected to experience settlement; future maintenance lifts of additional stone are planned.
