

Wade Harrell, Ph.D.

Email: wade_harrell@fws.gov

Dr. Wade Harrell is the National Whooping Crane Recovery Coordinator for U.S. Fish & Wildlife Service (FWS) and co-leads the International Recovery Team. He is stationed at Aransas National Wildlife Refuge in Austwell, Texas. Wade has been in this position for 5 years and previously served as a private lands coordinator for USFWS and coastal prairie project manager for The Nature Conservancy in Texas. Wade conducted his graduate work at Oklahoma State University on fire impacts in native grassland and shrubland ecosystems.

Aaron Pearse, Ph.D.

Email: apearse@usgs.gov

Dr. Aaron Pearse is a Research Wildlife Biologist with the U.S. Geological Survey and stationed at Northern Prairie Wildlife Research Center in Jamestown, North Dakota. Since 2007, he has worked primarily with migratory birds and has addressed needs of natural resource managers by providing answers that lead to science-based management of wildlife species and ecosystems in which they depend. Aaron received graduate degrees at Mississippi State University and the University of Idaho.
