

NATIONAL INITIATIVES VIEWER TOOL (AKA QLIK): THE PARTNERSHIP SPECIAL

September 28, 2023

Ashleigh Boss

NRM Technical Support Team

U.S. ARMY

US Army Corps
of Engineers®

U.S. ARMY

PURPOSE OF NIVT

- Present USACE staff at all administrative levels access to common information about landscape scale conservation initiatives, and the spatial relationship between areas of interest and Project Site locations
- Simplify data exploration based on disparate sources of information
- Encourage new ideas for land and habitat management and program coordination based on the Corps footprint
- Allows staff to explore internal data across fiscal years and geospatial scales

U.S. ARMY

PARTNERSHIPS & VOLUNTEERS DATA

- 2 modules/sheets
- Soft launch in early August
- Includes data from 2010-2022
 - Intend to update annually moving forward
- Value to each level of organization
 - Surf for partnership ideas
 - Phone a friend
 - District rollup/data call
 - Divisional or National too!

USACE Partnerships

Overview

This module contains data for the USACE Partnership Program from FY10 to present. Data displayed is a cumulative total until a fiscal year filter is applied. Some key filters are located below this text box. Additional information on the Partnership Program can be found on the NRM Gateway here.

In today's financial environment PARTNERING is an essential tool that allows the U.S. Army Corps of Engineers to effectively manage recreation and environmental resources. In order to successfully meet our recreation and stewardship missions, and to foster shared values, vision, and a sense of ownership it is imperative that we work together with state governments, Native American tribes, private/public organizations, local communities, and other partners to maintain or advance programs from wildlife protection and habitat improvement to recreational facility enhancements. Partnering helps to pool scarce resources, to promote coordinated, focused, and consistent mutual efforts to resolve common problems and missions, and to avoid unnecessary

NRM Partnership Agreement... Decision Tree Contributions Flow Chart

NRM Partnership Agreement Approval Levels

Table with 8 columns: Agreement Type, Authority, Special Considerations, \$ Value, Signature*. Rows include Challenge Cost Sharing Cooperative Management, Challenge Partnership, Contribution, Cooperating Association, Cooperative Agreement - Noxious Weed Management, Cooperative Agreement -with Indian Tribes for fish/ wildlife, water quality, cultural resource protection, Cooperative Agreement- Collaborative Research & Development (CESU Program), Cooperative Agreement- Educational/Training Activities, Economy Act, Memorandum of Agreement (MOA), and Memorandum of Understanding (MOU).

This document is intended to provide a brief overview of available partnership authorities and approval requirements. Corps personnel should coordinate all proposed agreements with their Office of Counsel. Note: Signature levels listed are national standards. District Commanders have the authority to set stricter standards for their command. Check with your District Office of Counsel for further guidance.

USACE Partnerships

Overview

In today's financial environment **PARTNERING** is an essential tool that allows the U.S. Army Corps of Engineers to effectively manage recreation and environmental resources. In order to successfully meet our recreation and stewardship missions, and to foster shared values, vision, and a sense of ownership it is imperative that we work together with state governments, Native American tribes, private/public organizations, local communities, and other partners to maintain or advance programs from wildlife protection and habitat improvement to recreational facility enhancements. Partnering helps to pool scarce resources, to promote coordinated, focused, and consistent mutual efforts to resolve common problems and missions, and to avoid unnecessary duplication of effort. The NRM Program has embraced this reality and is committed to fully exploring the potential development of new public-private partnerships to leverage limited appropriated funds and human resources. The bottom line: **partnering is smart business.**

In today's financial environment **PARTNERING** is an essential tool that allows the U.S. Army Corps of Engineers to effectively manage recreation and environmental resources. In order to successfully meet our recreation and stewardship missions, and to foster shared values, vision, and a sense of ownership it is imperative that we work together with state governments, Native American tribes, private/public organizations, local communities, and other partners to maintain or advance programs from wildlife protection and habitat improvement to recreational facility enhancements. Partnering helps to pool scarce resources, to promote coordinated, focused, and consistent mutual efforts to resolve common problems and missions, and to avoid unnecessary duplication of effort. The NRM Program has embraced this reality and is committed to fully exploring the potential development of new public-private partnerships to leverage limited appropriated funds and human resources. The bottom line: **partnering is smart business.**

Overview

This module contains data for the USACE Partnership Program from FY10 to present. **Data displayed is a cumulative total until a fiscal year filter is applied.** Some key filters are located below this text box. Additional information on the Partnership Program can be found on the [NRM Gateway here](#).

In today's financial environment **PARTNERING** is an essential tool that allows the U.S. Army Corps of Engineers to effectively manage recreation and environmental resources. In order to successfully meet our recreation and stewardship missions, and to foster shared values, vision, and a sense of ownership it is imperative that we work together with state governments, Native American tribes, private/public organizations, local communities, and other partners to maintain or advance programs from wildlife protection and habitat improvement to recreational facility enhancements. Partnering helps to pool scarce resources, to promote coordinated, focused, and consistent mutual efforts to resolve common problems and missions, and to avoid unnecessary duplication of effort. The NRM Program has embraced this reality and is committed to fully exploring the potential development of new public-private partnerships to leverage limited appropriated funds and human resources. The bottom line: **partnering is smart business.**

Overview

This module contains data for the USACE Volunteer Program from FY10 to present. **Data displayed is a cumulative total until a fiscal year filter is applied.** Some key filters are located below this text box. Additional information on the Partnership Program can be found on the [NRM Gateway here.](#)

Making a difference
 Volunteers play an invaluable role in helping the Corps of Engineers meet our recreation and environmental stewardship program goals. Each year, they give their time, expertise and resources to serve nearly 270 million visits by the public to USACE managed lands and waters. On average, approximately 35,000 USACE volunteers donate 1.5 million hours annually – the equivalent of 620 full time employees—with a labor value of \$40 million, annually. In the natural resources management community, volunteer work equals approximately 20% of our workforce. More than 60 cooperating associations and 4,500 national and local partners also provide volunteers to help support the work of USACE.
 Although volunteers' skills, knowledge, and time are priceless, USACE uses the figure calculated annually by the Independent Sector, the leadership forum for charities, foundations and corporate giving programs, to put a monetary value on volunteer contributions. Visit
