

Civil Engineer

SME Biography for Dwayne Ford

Mr. Ford has over 20 years of experience working with munitions and hazardous, toxic, and radioactive waste projects. During that time, Dwayne has worked within the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); Resource Conservation and Recovery Act (RCRA); and state regulatory frameworks and has executed projects for the Formerly Used Defense Sites (FUDS), Base Realignment and Closure (BRAC), EPA Brownfields, and a variety of other customers. His past experience includes environmental project management, investigation, design, construction, and public involvement. Currently, he serves on the staff of the U.S. Army Corps of Engineers' Environmental and Munitions Center of Expertise, specializing in munitions and risk communication. Dwayne has developed and instructs several training courses regarding Military Munitions Response Program processes, risk communication, public involvement, and technical project planning. Mr. Ford has a B.S. in Mechanical Engineering from the University of Tennessee and a Master of Engineering in Environmental Engineering from the University of Texas, Arlington. Dwayne served on the city council for Annetta North, Texas from 2006 – 2010, was a community columnist for the *Fort Worth Star-Telegram* newspaper in 2005, and was interviewed on the national television news show *20/20* for a munitions removal project.
