

Stephen Enloe, PhD

University of Florida, IFAS

Center for Aquatic and Invasive Plants

Email: sfenloe@ufl.edu

Dr. Enloe has been involved with invasive plant research and extension for the past 22 years. He has worked throughout the western and southeastern United States, including California, Colorado, Wyoming, Alabama, and Florida. Over his career, Dr. Enloe has researched control methods for a wide array of invasive plants including thistles, knapweeds, winter annual grasses, woody shrubs, trees, vines, and more recently, aquatic species. Dr. Enloe earned his Ph.D at UC Davis in Plant Biology under Dr. Joseph DiTomaso, a Master's degree in weed science from Colorado State University under Dr. Scott Nissen, and an undergraduate degree in Agronomy from NC State.
