MEMORANDUM FOR ALL MAJOR SUBORDINATE COMMANDS AND DISTRICT
COMMANDS, ATTN: CHIEFS, NATURAL RESOURCE
MANAGEMENT BRANCHES

SUBJECT: 1992 Natural Resource Management System (NRMS) Update

1. The materials you need to perform the 1992 update of the NRMS
are provided both as enclosures to this memorandum and under
separate mailings. Enclosure 1 includes an updated page 2 of the
draft NRMS User's Manual. You should replace the corresponding
page 2 in the draft manual, dated 29 April 1991, provided you
during the 1991 annual update. Enclosure 2 is an updated
Appendix A to this manual, which contains definitions for all
datafields in the system, both in update order and in alphabe-
tical order. Enclosure 3 is an updated Appendix E to the manual,
which contains data field structures and edit criteria. A page
summarizing FY 92 changes to databases and data elements is also
included.

2. Under separate mailing, you will receive a package of
diskettes which contains your District's NRMS data, several
canned report programs and the programs to update the data, run
the image lists and generate blank image list forms.

3. There were only a few changes to datafields this year.

     a. Three new datafields have been added to the PR_MAIN
database for reporting the Congressional District(s) in which the
project is located. The primary, secondary, and tertiary
Congressional Districts will be reported by the standard one- or
two-digit number representing those districts.

     b. One new datafield has been added to the PR_MAIN database
to report the existence of an organized group in the project area
which has potential to become a cooperating association. This is
a "Y" or "N" response.

     c. One new datafield has been added to the PERSNEL database
for reporting tenths of total FTE. In the past, total FTE has
been rounded; this new field will allow more accurate reporting.

     d. A completely new area database has been added, called
COOP_AS. This database will contain information regarding
cooperating associations operating at the project. Definitions
for each of the datafields are provided in Appendix A to the NRMS
manual.

4. All visitation information should be derived from the Visitor Estimation and Reporting System (VERS). Please make a narrative note for each visitation entry to indicate if it was estimated using VERS or not.

5. An update program has been developed for the DIV_DIS database for this year. Instructions for using this program may be found in the "README.1ST" file on your update diskettes. District DIV_DIS databases will be sent to the appropriate districts, as was done last year. Divisions will receive their own database for updating during the FY 92 update for the first time.

6. A program to update the NARATIVE database is also provided this year. This will allow you to view, change, or delete existing narrative comments about your NRMS data without entering the update program. New narrative comments must, however, still be entered through the update program. Instructions for using this program are also found in the "README.1ST" file.

7. The datafield definitions, as found in APPENDIX A, are also available on help screens in the update program. These may be viewed as you are inputting changes. Some definitions have been changed for clarity or to change in some way the information we wish to collect. Make sure you read the definition for each datafield and review the data in the system to assure it satisfies the current definition. Do not assume the information is correct if it is unchanged from last year.

8. You are receiving one copy of your district's data. You may split the data to send to your project offices for updating, if you wish, using the EXTRACT option in the update program. You must then merge all projects' data for return to CESWF-OD-MR, using the MERGE option in the update program. The MERGE routine must be performed on the same machine that performs the EXTRACT routine. If you do this, made sure that you also send each project a copy of each of the five program diskettes and a copy of the draft NRMS User's Manual. Do not expect or allow anyone to update the databases without access to and knowledge of the datafield definitions.

9. Before attempting to load any of the disks, you need to print the README.1ST file contained on program disk #1. Instructions to print this file are in paragraph 1.2.5, on page 4, of the manual. This file contains up-to-date instructions on loading and running the update program.

10. Michael Owen will again be coordinating the update from the Fort Worth District, as he did for the FY 91 update. He may be contacted by telephone at (817) 334-4637 (FTS 334-4637), by
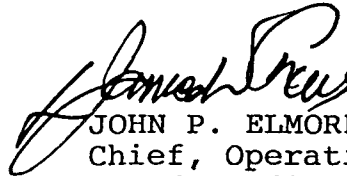

CECW-ON

C - Joint (Interior-Corps) acquisition policy.From 1962 to 1971, land was acquired in fee usually with 3 to 5 feet of freeboard above full pool or 300 feet horizontally above the full pool elevation level, whichever resulted in the acquisition of more land. D - Acquisition policy from July 1971 to present.In 1971, the implementation of the joint policy was revised in that the guidelines for taking lands for fee acquisition would be a 300 foot block-out of the conservation pool or 3 to 5 feet of freeboard above the full pool level, whichever resulted in the acquisitionof more land.
