MEMORANDUM FOR ALL MAJOR SUBORDINATE COMMANDS AND DISTRICT
COMMANDS, ATTN: CHIEFS, NATURAL RESOURCES
MANAGEMENT BRANCHES

SUBJECT: 1993 Natural Resources Management System (NRMS) Update

1. Reference ER 1130-2-414 and the NRMS User's Manual, dated 29 April 1991, for general information regarding the NRMS. The materials you need to perform the 1993 update of the NRMS will be provided by separate mailing from the Fort Worth District. This mailing will consist of diskettes containing your district's NRMS data and the necessary update programs, revised NRMS field definitions in both alphabetical and update order (Appendix A of the NRMS User's Manual), and additional information regarding the update this year.

2. A number of additions and changes have been made to NRMS datafields this year. These changes are described below. Please read the appropriate datafield definitions included in NRMSHELP and in the materials provided in your update package prior to inputting data to these fields.

a. Three datafields were added to AR_MAIN to incorporate recreation cost tracking reporting in the NRMS. Datafields CST_TRK06, CST_TRK29, and CST_TRK80 will be used to report costs charged to the 06, 29 and 80 feature cost codes respectively for the 1993 fiscal year. This will eliminate a separate recreation cost tracking report requirement.

b. One new datafield, VISITS, has been added to AR_MAIN to report recreation visits to the recreation area.

c. One new datafield, VERS_USE, has been added to PR_USE to report if the Visitor Estimation and Reporting System was used to compute project and area visitation during the report fiscal year.

d. One new datafield, RESERVE, has been added to both CUR_FEE and PRO_FEE to report the use of a campground reservation system at the recreation area.

e. One new datafield, AUPS, has been added to both CUR_FEE and PRO_FEE to report the use of the Automated User Permit System at the recreation area.

SUBJECT: 1993 Natural Resources Management System (NRMS) Update

f. Three new datafields have been added to PR_MAIN for reporting the State code associated with the primary, secondary, and tertiary Congressional districts in which the project is located. This was done to correct a problem discovered with the Congressional district fields, which were new to the system last year.

g. A new datafield, FISH_DOCK, has been added to OPEN_FC, CLOSED, and CONCESN to report the number of fishing docks or piers at the recreation area. This addition is the result of user suggestions.

h. Two new datafields, T_AREA_CD and TELEPH_NO, have been added to VIS_CTR to report the telephone number for the visitor center.

j. Two datafields, POLUT_ABAT and BEACH_EROS, have been deleted from PR_MAIN due to the minimal number of projects having these project purposes. Two datafields, WATER_QUAL and LO_FLO_AUG, were added to PR_MAIN to accommodate the greater number of projects having these purposes. The Department of the Army Corps of Engineers report, "Authorized and Operating Purposes of Corps of Engineers Reservoirs", dated July 1992, is the definitive source for this information.

k. Several datafields in PRO_FEE were added or modified to report information relative to the new day recreation user fee program.

- A new datafield, PFEE_DAY, was added to PRO_FEE to report the proposed fee for the use of day user facilities in the recreation area.

- The existing datafield, PFEEA_CLAS, in PRO_FEE has been modified to include a new value, "Z". This value will be used to report the recreation area is a day user fee area.

- The existing datafield, PFEEA_MCOL, in PRO_FEE has been modified to allow "Honor Vault" to be specifically reported as a method of collection. This is done by using the letter "H".

l. The definitions for two datafields, TL_PRJ_SGN and FL_CON_SGN, in PR_STAT have been clarified regarding signs located on leaseholds. This was done due to confusion in last year's reporting.

m. The definition for POTEN_COOP in PR_MAIN was clarified at the request of users.

CECW-ON

SUBJECT: 1993 Natural Resources Management System (NRMS) Update

n. Several datafields in OPEN_FC, CLOSED and CONCESN were changed to report the number of facilities provided at the recreation area, rather than just "Y" or "N". These datafields are PLAYGROUND, COURTESY DOCK, DUMP_STATN, and FISH_CLEAN. This was done at the request of NRMS users.

3. A definition for a new datafield was inadvertently omitted from the NRMSHELP database and from the definitions printout. The datafield is PFEE_DAY in PRO_FEE, as described in paragraph 2.k. above. The definition should read:

DAY USER FEE - Enter the recreation day user fee proposed for the coming recreation season for the recreation area.

4. The data currently in the project purposes datafields in the PR_STAT database was modified during the 1992 database reconciliation to reflect information contained in the Department of the Army Corps of Engineers report, "Authorized and Operating Purposes of Corps of Engineers Reservoirs". This report is now our definitive source for this information. Please do not change the data in these fields, except as pursuant to paragraph 2.j. above. If you believe the existing data does is not consistent with the report, please make a narrative entry and we will review the matter during the database reconciliation this year.

5. Several new datafields will be added for the 1994 NRMS update.

a. Datafields will be added to CUR_FEE to report performance of the day user fee program. Information which will be reported in these fields will include the day user fee charged for the report fiscal year and the total day user fee revenues collected.

b. Datafields will be added to report information relative to the number of contacts made through the interpretive program. The following wording is being considered.

- On-site Interpretive Contacts: All visitors attending interpretive programs at the project, such as guided walks, campfire programs, programs on outgrants, facility tours, talks, visitor center audiovisual programs, conservation fairs, roving interpretation, living history, public meetings that include an interpretive message, and individual interpretive contacts. Participants in special events such as shoreline cleanups can be included if they receive interpretive messages. Simple dissemination of written information should not be included.

- Direct Off-Site Interpretive Contacts: All interpretive contacts made off-project to include school programs, youth and civic group programs, career days, fairs,

shows and cooperating association programs. At large events, only individuals who actively interact with the exhibit or the attendant should be counted, not the total number of event attendees. Although it is realized that indirect off-site contacts occur via public service announcements, bulletin boards, radio and television interviews, imprinted messages, theater messages, etc., these should not be included.

6. Divisions should assure that the division portion of the DIV_DIS database is updated this year. The division may update its own data or assign a district to perform that task.

7. Please read the README.1ST file on program disk #1 before attempting to load the program. This file contains instructions for loading and running the 1993 NRMS program.

8. Mr. Mike Owen will again be coordinating the update from the Fort Worth District Office. He may be reached by telephone at (817)334-4637 (FTS 334-4637), by CORPSMAIL at MICHAEL D OWEN, or by FAX at (817)334-2120 (FTS 334-2120). Updated data disks are due to Mr. Owen by COB 3 December 1993.

9. POC for the NRMS program in CECW-ON is Judy Rice, (202) 272-1796.

| PR_STAT | ACQ_POLICY | <p>ACQUISITION POLICY - Enter the letter A,B,C,D or E that indicates the acquisition policy under which the real estate for the project was acquired in accordance with the definitions below. Land acquired after 1971 was not necessarily acquired under the policy as explained in code D, below, therefore, for the purpose of this report, determine not only when the land was acquired, but also under which specific policy.</p> <p>A - Pre-1953 acquisition policy. Prior to 1953 the acquisition by the Corps was largely determined on a case-by-case basis. However, the Corps policy in general was to obtain fee title to lands up to the fullpool elevation level of the reservoir. Additional lands needed for operations or for other authorized purposes were also acquired in fee. B - 1953 acquisition policy. From 1953 to 1962, the Corps acquired fee title to lands only to the 5-year flood frequency level. Flowage easements were obtained from this level to the full pool level. Minimum additional lands were acquired in fee where needed for operations or for public access. C - Joint (Interior-Corps) acquisition policy. From 1962 to 1971, land was acquired in fee usually with 3 to 5 feet of freeboard above full pool or 300 feet horizontally above the full pool elevation level, whichever resulted in the acquisition of more land.</p> <p>D - Acquisition policy from July 1971 to present. In 1971, the implementation of the joint policy was revised in that the guidelines for taking lands for fee acquisition would be a 300 foot block-out of the conservation pool or 3 to 5 feet of freeboard above the full pool level, whichever resulted in the acquisition of more land. E - Land was acquired under more than one acquisition policy.</p> |

| PR_STAT | ACQ_POLICY | <p>ACQUISITION POLICY - Enter the letter A,B,C,D or E that indicates the acquisition policy under which the real estate for the project was acquired in accordance with the definitions below. Land acquired after 1971 was not necessarily acquired under the policy as explained in code D, below, therefore, for the purpose of this report, determine not only when the land was acquired, but also under which specific policy.</p> <p>A - Pre-1953 acquisition policy. Prior to 1953 the acquisition by the Corps was largely determined on a case-by-case basis. However, the Corps policy in general was to obtain fee title to lands up to the fullpool elevation level of the reservoir. Additional lands needed for operations or for other authorized purposes were also acquired in fee. B - 1953 acquisition policy. From 1953 to 1962, the Corps acquired fee title to lands only to the 5-year flood frequency level. Flowage easements were obtained from this level to the full pool level. Minimum additional lands were acquired in fee where needed for operations or for public access. C - Joint (Interior-Corps) acquisition policy. From 1962 to 1971, land was acquired in fee usually with 3 to 5 feet of freeboard above full pool or 300 feet horizontally above the full pool elevation level, whichever resulted in the acquisition of more land.</p> <p>D - Acquisition policy from July 1971 to present. In 1971, the implementation of the joint policy was revised in that the guidelines for taking lands for fee acquisition would be a 300 foot block-out of the conservation pool or 3 to 5 feet of freeboard above the full pool level, whichever resulted in the acquisition of more land.
