

Carters Lake Volunteers Receive Volunteer Recognition Coins

During the winter of 2019/ 2020 local volunteers banded together to assist with the maintenance of Woodring Day Use at Carters Lake. The day use was slated to be seasonally closed for the winter to reduce winter maintenance cost. Local residents living nearby wished to form work groups to take the burden of cleaning and maintenance. The volunteers were split into 4 teams who worked in the park twice a week every four weeks. They completed work such as trash collection, leaf blowing, litter pick-up, and restroom cleaning. The willingness and dedication of these volunteers allowed for the park to stay opened for the entire winter season. Without their dedication, the community and lake visitors would have lost seasonal access to a wonderful asset on Carters Lake.
