

## Thurmond Lake 2018 Volunteer Coin Recipients

Ron & Cindy Furr - Have been the go to couple for maintenance and general repair work. Over the years they have constructed information boards (Kiosk) for use by the public and they ensure that little task did not get bogged down or forgotten about due to other priorities. They have been readily available for anything that has been asked of them.

Bill & Carol Roy - They are the primary water safety contact volunteers as they go out to the schools and present water safety materials to children of all ages to better educate them on the potential hazards of water and the lake.

Mike & Terri Young - They count and assist in maintaining our record keeping for recreational fee areas. They helped develop a better tracking program that transferred our counting process from manual to electronic recording keeping mythologies. They also serve as the secondary couple to Mr. & Mrs. Roy in water safety presentations.

All couples have been involved heavily in specialized projects over the years such as annual Christmas tree collection and disposal, annual waterfowl surveys, National Public Lands Day, volunteer work days and other projects as they have arose across the project.
