

New Jersey Shoreline, Alternative Long-term Nourishment Study (Philadelphia District)

New Jersey Shoreline, Alternative Long-term Nourishment Study (Philadelphia District)
– evaluate methods to manage New Jersey’s coastal projects on a regional basis to ensure maximum benefits are achieved from the large Federal investment and to reduce long-term periodic nourishment costs. Study will produce a regional sediment budget plan, improved understanding of regional coastal processes, an efficient regional monitoring program, and a comprehensive beach, inlet, and borrow area management strategies plan – with NJ Department of Environmental Protection, National Marine Fisheries Service, USFWS.
