CESU Interim Report Summary for
Long Island Regional Sediment Management: Coastal Planning Project
W912HZ-09-2-0007

Location: Long Island, NY.
Proposed Methods: Conduct planning meetings, develop a project delivery team, review sand inventory, wave impacts of offshore ridges and potential inshore sediment transport, prepare a white paper, form a Coastal Sediment Management Work Group, and prepare a final report.
Anticipated Results: Monthly progress reports and final report.
Proposed Researchers: Henry Bokuniewicz (Stony Brook University), Joseph Tanski (Cornell University)
Prepared For: USACE
CESU: North Atlantic Coast
