Making Trails Work, Lake Shelbyville Chief Illini Trail Rehab Work

Before

After

Rehab work on the 11 mile Chief Illini Trail links the IDNR's Eagle Creek State Park with the USACE's Lone Point Recreation Area. Trail for Illinois where instrumental in acquiring the AmeriCorps NCCC for 8 weeks as well as the essential tools needed for trail maintenance. Boy Scouts of America, CIMBA, Dacey Trail, and other local volunteers also assisted. Work consists of re-routing low areas of trail, re-build bridges, bench cutting, erosion and invasive species management, and create way finding markers.

Making Trails Work, Lake Shelbyville Dacey Trail Extension

The Dacey Trail Extension consists of building a single track multi use trail over 5 miles in length that includes two trail loops, a creek crossings, and created both aesthetic appeal and minimized potential environmental impacts. This section of the trail was primarily built by the Student Conservation Association (SCA). However, much support from partners like the Central Illinois Mountain Bike Association, Dacey Trail, and the Lake Volunteers Association insured the trails completion.
