Lake Georgetown– Sea Scout Project:

Recently, a Sea Scout finished his first of two required service projects, first being at Lake Georgetown, towards his Quartermaster Award. The Sea Scout was able to install 5 new benches along the San Gabriel River Trail in rural locations. These benches were strategically placed so recreators will have a place to relax and/or have a chance to hydrate a couple of miles away from a trail head. Recreation is a Corps mission that Lake Georgetown is always striving to better and improve safety.
