Bird watching = partnership?

NC State biology and computer science department

- + interested citizens
- + Jordan Lake
- = EAGLE CAM

This project originated when Army Corps of Engineers biologist, Francis Ferrell, led a class of NCSU ornithology students on a visit to an active Jordan Lake Bald Eagle nest in March 2010.

Our team of volunteer engineers, NCSU graduate students, faculty, and staff formed over the next six months.

We installed video cameras at an active nest in October and began monitoring the breeding pair just before the female laid two eggs in early December.
