Minnesota comes from the Dakota word Mnisota, which is sometimes translated as sky-tinted water, a fitting word that describes a region that is overflowing with lakes and rivers filled with clear, sky-blue waters. At our Corps of Engineers lakes and river projects you can fish for pike and walleye, paddle our shorelines, or take a swim to cool off after a day of fun under the sun with your family. A seemingly endless supply of land and water resources means Minnesota has something for everyone!
